

First example: Question 1

Question: What was the win/loss ratio in 2015 for the Carolina Panthers during their regular season?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: The Panthers finished the regular season with a 15–1 record, and quarterback Cam Newton was named the NFL Most Valuable Player (MVP). They defeated the Arizona Cardinals 49–15 in the NFC Championship Game and advanced to their second Super Bowl appearance since the franchise was founded in 1995. The Broncos finished the regular season with a 12–4 record, and denied the New England Patriots a chance to defend their title from Super Bowl XLIX by defeating them 20–18 in the AFC Championship Game. They joined the Patriots, Dallas Cowboys, and Pittsburgh Steelers as one of four teams that have made eight appearances in the Super Bowl.

Question: What was the win/loss ratio in 2015 for the Carolina Panthers during their regular season?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

First example: Question 2

Question: Whic NFL team represented the NFC at Super Bowl 50?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: The Panthers finished the regular season with a 15–1 record, and quarterback Cam Newton was named the NFL Most Valuable Player (MVP). They defeated the Arizona Cardinals 49–15 in the NFC Championship Game and advanced to their second Super Bowl appearance since the franchise was founded in 1995. The Broncos finished the regular season with a 12–4 record, and denied the New England Patriots a chance to defend their title from Super Bowl XLIX by defeating them 20–18 in the AFC Championship Game. They joined the Patriots, Dallas Cowboys, and Pittsburgh Steelers as one of four teams that have made eight appearances in the Super Bowl.

Question: Whic NFL team represented the NFC at Super Bowl 50?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

First example: Question 3

Question: Who did in the Panthers beat the NFC Championship Game?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: The Panthers finished the regular season with a 15–1 record, and quarterback Cam Newton was named the NFL Most Valuable Player (MVP). They defeated the Arizona Cardinals 49–15 in the NFC Championship Game and advanced to their second Super Bowl appearance since the franchise was founded in 1995. The Broncos finished the regular season with a 12–4 record, and denied the New England Patriots a chance to defend their title from Super Bowl XLIX by defeating them 20–18 in the AFC Championship Game. They joined the Patriots, Dallas Cowboys, and Pittsburgh Steelers as one of four teams that have made eight appearances in the Super Bowl.

Question: Who did in the Panthers beat the NFC Championship Game?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

First example: Question 4

Question: Who was quarterback Cam Newton named?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: The Panthers finished the regular season with a 15–1 record, and quarterback Cam Newton was named the NFL Most Valuable Player (MVP). They defeated the Arizona Cardinals 49–15 in the NFC Championship Game and advanced to their second Super Bowl appearance since the franchise was founded in 1995. The Broncos finished the regular season with a 12–4 record, and denied the New England Patriots a chance to defend their title from Super Bowl XLIX by defeating them 20–18 in the AFC Championship Game. They joined the Patriots, Dallas Cowboys, and Pittsburgh Steelers as one of four teams that have made eight appearances in the Super Bowl.

Question: Who was quarterback Cam Newton named?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

First example: Question 5

Question: Which team finished the regular season?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: The Panthers finished the regular season with a 15–1 record, and quarterback Cam Newton was named the NFL Most Valuable Player (MVP). They defeated the Arizona Cardinals 49–15 in the NFC Championship Game and advanced to their second Super Bowl appearance since the franchise was founded in 1995. The Broncos finished the regular season with a 12–4 record, and denied the New England Patriots a chance to defend their title from Super Bowl XLIX by defeating them 20–18 in the AFC Championship Game. They joined the Patriots, Dallas Cowboys, and Pittsburgh Steelers as one of four teams that have made eight appearances in the Super Bowl.

Question: Which team finished the regular season?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

Second example: Question 1

Question: What part of the innate immune system identifies microbes and triggers immune response?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: Microorganisms or toxins that successfully enter an organism encounter the cells and mechanisms of the innate immune system. The innate response is usually triggered when microbes are identified by pattern recognition receptors, which recognize components that are conserved among broad groups of microorganisms, or when damaged, injured or stressed cells send out alarm signals, many of which (but not all) are recognized by the same receptors as those that recognize pathogens. Innate immune defenses are non-specific, meaning these systems respond to pathogens in a generic way. This system does not confer long-lasting immunity against a pathogen. The innate immune system is the dominant system of host defense in most organisms.

Question: What part of the innate immune system identifies microbes and triggers immune response?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

Second example: Question 2

Question: The adaptive immune system must distinguish between what types of molecules?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: Microorganisms or toxins that successfully enter an organism encounter the cells and mechanisms of the innate immune system. The innate response is usually triggered when microbes are identified by pattern recognition receptors, which recognize components that are conserved

among broad groups of microorganisms, or when damaged, injured or stressed cells send out alarm signals, many of which (but not all) are recognized by the same receptors as those that recognize pathogens. Innate immune defenses are non-specific, meaning these systems respond to pathogens in a generic way. This system does not confer long-lasting immunity against a pathogen. The innate immune system is the dominant system of host defense in most organisms.

Question: The adaptive immune system must distinguish between what types of molecules?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

Second example: Question 3

Question: Innate immune defenses do what?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: Microorganisms or toxins that successfully enter an organism encounter the cells and mechanisms of the innate immune system. The innate response is usually triggered when microbes are identified by pattern recognition receptors, which recognize components that are conserved among broad groups of microorganisms, or when damaged, injured or stressed cells send out alarm signals, many of which (but not all) are recognized by the same receptors as those that recognize pathogens. Innate immune defenses are non-specific, meaning these systems respond to pathogens

in a generic way. This system does not confer long-lasting immunity against a pathogen. The innate immune system is the dominant system of host defense in most organisms.

Question: Innate immune defenses do what?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

Second example: Question 4

Question: The innate immune system responds in a generic way, meaning is it what?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: Microorganisms or toxins that successfully enter an organism encounter the cells and mechanisms of the innate immune system. The innate response is usually triggered when microbes are identified by pattern recognition receptors, which recognize components that are conserved among broad groups of microorganisms, or when damaged, injured or stressed cells send out alarm signals, many of which (but not all) are recognized by the same receptors as those that recognize pathogens. Innate immune defenses are non-specific, meaning these systems respond to pathogens in a generic way. This system does not confer long-lasting immunity against a pathogen. The innate immune system is the dominant system of host defense in most organisms.

Question: The innate immune system responds in a generic way, meaning is it what?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____

Second example: Question 5

Question: What does Microorganisms encounter?

1) Is the question grammatically correct? Answer no if you can see some grammatical errors, also the ones that can look like a typo.

Yes

No

2) Is the question comprehensible? Answer no if you can not work out what the question is asking.

Yes

No

3) Is the question idiomatic/natural? Answer no if you feel that the question is awkward or sounds unnatural when read aloud.

Yes

No

4) Please read the following paragraph before answering the questions below.

Paragraph: Microorganisms or toxins that successfully enter an organism encounter the cells and mechanisms of the innate immune system. The innate response is usually triggered when microbes are identified by pattern recognition receptors, which recognize components that are conserved among broad groups of microorganisms, or when damaged, injured or stressed cells send out alarm signals, many of which (but not all) are recognized by the same receptors as those that recognize pathogens. Innate immune defenses are non-specific, meaning these systems respond to pathogens in a generic way. This system does not confer long-lasting immunity against a pathogen. The innate immune system is the dominant system of host defense in most organisms.

Question: What does Microorganisms encounter?

4.1) Does the question have a clear and unambiguous answer within the input paragraph? Answer no if you can not find a unique and clear answer in the text above.

Yes

No

4.2) If you have answered no in the question 4.1 please choose the case that applies:

I) The question can be answered correctly by more than one incompatible responses given by the input paragraph.

II) The question is partially answered by the input paragraph, that is the input paragraph supplies information for answering only part of the question.

III) The question can not be answered by the input paragraph.

IV) No one of the above apply. The reason is _____
